

The Sweetest Thing

ONE OF THE SWEETEST PARTS OF WEDDING PLANNING? Cake tastings and choosing your wedding desserts! Whether you want a statement cake or a dessert table, buttercream or fondant, there's a delightful dessert option that's perfect for every wedding.

Sweet selection: Dessert tables and mini-desserts are a great way to add another visual display at your reception, plus you won't have to decide between all those delicious cake flavours! Instead of committing to cupcakes, consider picking a centrepiece cake for the cake cutting and a selection of smaller desserts for guests to choose from.

Get glitzy: From a subtle shimmering of edible gold leaf to tiers of all-out glitter, metallic touches work with almost every style of dessert! Unexpected ways to add a metallic touch include detailed lace patterns, fine edible glitter, or bold geometric patterns.

Pretty painting: Turn your cake into a canvas with watercolour washes, stained glass patterns, or painted florals and patterns. Your imagination is the limit with this trend!

Textured embellishments: Add some light and airy sugar ruffles, piped icing embroidery, or sugary rosettes. Alternate tiers on part of the cake for a beautiful accent or all over the cake for a sweet statement. Keep the look modern and beautiful by using white or ivory icing.

White on white: Go modern with all-white details! By adding texture and embellishments like piped patterns, petals, or pretty pearls, you can prove that monochromatic doesn't need to mean boring.

Great gems: Love the look of elegant marble or agate? Adore glittering geode crystals? Cake designs like these will make a flawless statement at your reception.

Mountains of macarons: Searching for the perfect centerpiece for your sweets table, or just looking for an alternative to cupcakes? A macaron tower is a chic option to a tiered cake. They're modern and you can even customize the colours to match your wedding theme and palette.

Fondant fun: Play with bold, whimsical patterns and add a smattering of fondant triangles, stripes and chevron, or pretty polkadots. Full of personality, fondant patterns are a perfect pop for modern urban weddings.
